Turn Key - EPC Projects

Our team's expertise and high-quality works lay right at the center of our success.

With over 26 years of experience, Electrogrup offers turnkey design, implementation, maintenance and dispatching solutions, in complex construction projects in the fields of energy, telecom and civil & industrial projects in Romania and beyond the borders.

Electrogrup divisions

Electrogrup ENERGETIC DIVISION

Electrogrup is one of the main builders of energy infrastructure in Romania. Our portfolio covers all types of works, from 0.4kV to 400 kV: substations, substations, overhead and underground power lines.

Electrogrup TELECOM DIVISION

Electrogrup is one of the largest national builders of telecommunications infrastructure in the country, covering all stages of implementation.

Electrogrup CONSTRUCTION DIVISION

Electrogrup is a general contractor in complex construction projects in Romania and abroad. We specialize in industrial construction, but our services cover any field of activity, from civil construction to photovoltaic parks.

Electrogrup NETCITY DIVISION

Electrogrup is a builder and provider of maintenance services for Netcity, the underground communications network in Bucharest.

Energy infrastructure services

- Design, authorization and implementation of 0.4 - 400 kV electrical network
- Transformer stations
- Smart Metering
- SCADA integration for power plant clusters
- Solutions for the development and the maintenance of photovoltaic parks, biomass power plants and wind farms
- Gas distribution networks
- Automation circuits in power plants, renewable sources (MHC up to 2 MW, PHV up to 6MW)
- SMART Metering in commercial and residential premises
- Low and medium current installations in buildings (including BMS, intercom, smart lighting)
- Primary circuits in substations, transformer stations and power grids (0.4-400 kV)

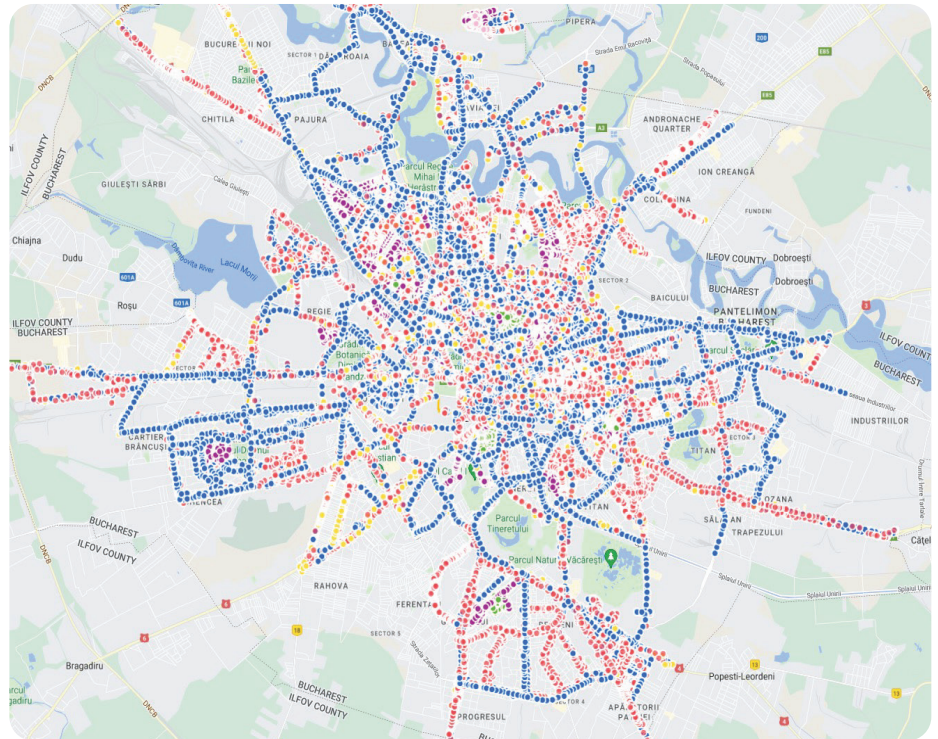

NETCITY Bucharest's underground communications network

The division builds and maintains the underground telecommunications infrastructure of Bucharest

In a period of **4 years**, between 2022 and 2025, the investment plan includes the construction of more than **1,700 km of Netcity network**

From the start of 2022 to September 2023, the division built over **780 km of Netcity network** and connected over **17.000 new buildings**.

2.500 km+

existing network
in 2023

Works:

- Civil works
- Microduct installation
- Fiber optics installation
