

## Electrogrup

With 20 years of experience in the field, Electrogrup was founded with the desire to provide innovative and high quality services in the area of power infrastructure.

The business further expanded to telecom infrastructure, new media, energy market, natural gases and renewable energies, turning the synergies of these fields into competitive advantages and pioneering the cross-sector concept. Currently, the company provides its customers, turn-key solutions in design, implementation, maintenance and dispatching, in relation to complex projects of power, telecom and civil infrastructure, constructed both nationwide and international wide.

The main piers of Electrogrup's success, the dynamism and modern technology, are the major competitive advantages of the company in its expansion strategy both in Romania and other markets.
