PROJECTS

WHO WE ARE

A general contractor built for complexity.

Electrogrup is a general contractor with nearly 30 years of experience in energy infrastructure, telecommunications and civil construction in Romania. We deliver critical infrastructure turnkey - from engineering and design through to execution and commissioning.

Our DNA in energy extends into industrial construction, civil works and specialised installations.

01

Turnkey delivery

Engineering, procurement and construction in one contract.

02

Own resources

Technical, logistical and certification capacity held in-house.

03

Group backing

Part of E-INFRA, a major Romanian infrastructure group.

Over 100 projects delivered in Romania and the wider region.

ENERGY · TELECOM · CIVIL · INDUSTRIAL

One contractor. The full scope.

A vertical collage of five images representing different sectors of infrastructure. The top image shows a high-voltage electrical substation with large transformers and power lines under a clear blue sky. The second image is a close-up of a large, green industrial pump or turbine. The third image shows a vast array of solar panels installed on a roof, with the sun setting in the background. The fourth image is a view looking up at a telecommunications tower with multiple antennas against a blue sky with clouds. The bottom image is a night-time view of a complex highway interchange with multiple overpasses and ramps, illuminated by streetlights.

- 01

High-voltage substations

Turnkey to energisation
 - 02

Battery energy storage

Six systems delivered
 - 03

Gas-fired power plants

Cogeneration, combined cycle
 - 04

Solar parks

Utility-scale generation
 - 05

Hydropower plants

Micro-hydropower installations
 - 06

Mobile telecom sites

Nationwide site build-out
 - 07

Roads and buildings

Roads, civil works

HOW WE DELIVER

One contract,
end to end.

A single accountable team carries the project from first drawing to energisation.

- 01

A

Engineering & design

Concept, detailed design and permitting, developed in-house.
- 02

🏠

Procurement

Equipment sourcing and supply-chain management across Europe.
- 03

🏗️

Construction

Civil, electrical and installation works by our own crews.
- 04

✅

Commissioning

Testing, energisation, grid connection and handover.

6 months

start to finish for the Florești
200 MW / 400 MWh battery
storage system.

7 months

start to finish for the Aukera
150 MW / 300 MWh battery
storage system.

SCALE

The capacity to deliver.

Resources sized for projects of national significance and the depth of engineering to run several of them at once.

7 COUNTRIES

With completed projects

100+ PROJECTS

Delivered in Romania and internationally

€500M IN 2026

Approximate value of works this year

A level of activity that places Electrogrup among the largest infrastructure contractors in Romania.

ENERGY STORAGE

Romania's leading battery storage contractor.

Six battery energy storage projects delivered for investors across Romania and the first company in the country to pass 1 GWh of installed storage capacity.

SELECTED PROJECTS

Proof at scale.

01 CLUJ COUNTY LARGEST BESS IN ROMANIA

Florești BESS

200 MW / 400 MWh

EPC contractor for Nova Power & Gas, part of E-INFRA.

02 CLUJ COUNTY

Câmpia Turzii energy complex

160 MW

Gas cogeneration, solar and combined-cycle generation.

03 CONSTANȚA COUNTY

Peștera II wind farm

392 MW

EPC contractor - developed by Copenhagen Infrastructure Partners.

04 IALOMIȚA COUNTY

Gura Ialomiței BESS

250 MW / 500 MWh

Phase 1 delivered in seven months for Aukera Energy.

Delivered for developers, utilities and investors across Romania and the region.

PARTNERSHIP

We have the expertise and the resources to execute projects to the agreed quality and within the agreed timelines.

Our company has nearly 30 years of experience in complex infrastructure projects, delivered in Romania and abroad.

Teodor Saru

CEO, ELECTROGRUP
